**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 27, 2007 has been entered.

***Allowable Subject Matter***

2. Claims 1, 2, 6, 7 and 11 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1, 2, 6, 7 and 11 are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an image processor and image processing method comprising a control unit to control a switch to directly transfer (n-1) lines of n lines of image data to (n-1) number of memories; directly transfer a remaining one line of the n lines of the image data directly to a compression unit, control the storage unit to transfer the (n-1) lines of the image data stored in the (n-1) number of memories to the compression unit simultaneously with the direct transfer of the remaining one line of the n lines of the image data to the compression unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Obara et al (US Patent No. 6,366,702) discloses a method and apparatus for image processing adapted for reducing the storage capacity of line memories needed for temporarily storing image data for lines.

b. Nomura (US Patent No. 6,795,581) discloses an image processing apparatus with a line compression unit.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Madeleine AV Nguyen whose telephone number is 571 272-7466. The examiner can normally be reached on Monday-Friday 9:00am-5:30pm.
